A Topeka girl, who has gone out of town for the summer, was flashing a brand new diamond into envious eyes just before she left. The girls say that she stages an act like that every little while, more for the ex-citement she witnesses than because she intends to end the engagement in a home of her own. The man in the case is not the same one she was reported to be engaged to last summer, for he has been going to call on another girl every other evening, and the current opinion seems to be that it is an out of town man. beneficial in more ways than one. The recent notion that kissing spreads germs and that it is for that spreads germs and that it is for that reason a dangerous diversion, is all foolishness. As a matter of fact, it soothes the nerves and is very beneficial to persons of a highly sensitive or nervous temperament. The idea that tuberculosis is contracted through the intimate embrace is exceedingly improbable and I am sure companion is a congenial member of the opposite gender.
